SAAS OPTIMISATION AS A SERVICE FOR REMOTE & MOBILE WORKFORCES

Migrating your apps to the cloud gives you better control and flexibility to deliver collaborative SaaS solutions like Microsoft Office 365, salesforce. com and Box.

But when you're transitioning from on-premises apps to a cloud-hosted solution, the trade-offs are often degraded performance levels and unsatisfactory end user experiences.

Bandwidth and latency are the two most important measures of network performance, but for SaaS apps, certain times of day, Wi-Fi connections, end user locations, devices, files sizes and unpredictable Internet traffic spikes all influence performance too.

Ironically, it's thanks to the increase in connectivity and improvement of technologies that more people are actively seeking flexible, mobile or remote working. SaaS apps therefore need their own optimisation strategy, just like any other business critical apps, but one that's designed with these extra performance factors in mind.

The good news is, you no longer need to compromise on SaaS performance. Even better, we can help you deploy your SaaS optimisation strategy today.

HOW WE HELP

SaaS Optimisation as a Service For Remote & Mobile Workforces is designed to enhance end user experience while reducing your WAN or Internet link utilisation.

Customised entirely for your SaaS environment, we'll help you accelerate delivery of SaaS apps and data to end users everywhere.

Leveraging Riverbed SteelHead Mobile components, we'll design our service around the SaaS apps you most need to optimise and your mobile or remote workforce. We'll deploy your solution using best-practice configurations, helping you mitigate implementation risk. We'll also make sure your service runs 24x7, monitored, supported and managed by Teneo's experts.

Our deployment costs are covered with a simple non-recurring cost (NRC) so you can get up and running, fast. Our subsequent, predictable monthly recurring cost (MRC) allows you to use your opex budget, avoiding an expensive upfront capital outlay, and accelerates your time to solution delivery.

WHAT WE'LL DO

Here's what we'll do:

- Technology specification and selection
- Project management and deployment
- Upgrades and changes
- Proactive 24x7 monitoring and management
- Quarterly reporting and recommendations

The result? We'll help you improve SaaS app adoption, increase end user productivity and boost satisfaction by optimising performance. You'll also reduce SaaS operating costs by minimising bandwidth usage, errors, and network overhead. Contact us today at **info@teneo.net** or **www. teneo.net** to start a conversation.

SERVICE BENEFITS

- **Pay for your SaaS Optimisation technology and management work as a predictable monthly recurring cost, saving you money in the long term.**

- **Accelerate delivery of SaaS apps like Microsoft Office 365, salesforce.com and Box to users everywhere.**

- **Tailor the service to your environment, always benefitting from the latest technology features and functionality.**

- **Increase end-user productivity and satisfaction by optimising SaaS app performance.**

- **Free your time up for other, higher priority things as Teneo takes SaaS Optimisation For Remote & Mobile Workforces off your hands.**
